Installation and operating instructions for HR12A PalmPad

The HR12A PalmPad Remote Control sends Wireless Radio Frequency (RF) signals to an X10 Transceiver (RR501 or TM751) or any X10 security system base receiver. The receiver then passes the signals onto your house wiring to control lights or appliances around your home. You plug lights and appliances into X10 Modules (sold separately). The PalmPad also works with the CM11A Two-Way Computer Interface to initiate macros (routines) so you can set up a "coming home" routine which is initiated when you press a button on the PalmPad.

1. Install 4 AAA alkaline batteries (sold separately) in the PalmPad's battery compartment.
2. Use a dime to set the Housecode dial to match the X10 Modules and Transceiver you want to control.
3. Plug in an X10 Transceiver (RR501 or TM751, sold separately).
4. Set the Palm Pad's slide switch to 1-8 to control X10 Modules set to Unit Codes 1 thru 8.
5. Set the slide switch to 9-16 to control X10 Modules 9 thru 16.
6. Press the corresponding ON or OFF button to turn X10 Modules on and off.
7. To brighten or dim lights connected to X10 Lamp Modules and Wall Switch Modules, first press the corresponding number button, then press the UP or DOWN (blue) buttons.
